

# Custom Applications

*Custom instrumentation and equipment engineered to your specifications and fabricated with the highest levels of craftsmanship. We can deliver any level of system from simple to complex, and we'll work with you to help design your custom equipment to ensure outstanding performance and continuous trouble-free operation.*

## **Custom equipment capabilities include:**

- cameras and vision systems for quality control and inspection
- instrumentation
- motion control systems for manufacturing, and assembly
- safety systems to protect operators and equipment
- design, fabrication, equipment assembly and testing
- robots and assembly
- clean room and sterile assembly
- turn key applications

## **Engineering disciplines include:**

- Mechanical and Electrical engineering
- Chemical Engineering
- Aerospace Engineering
- Computer Science and software development and integration
