

# Wire Winders

produce surgical-quality coils

multiple spools

winding compensation for consistent pitch

*RGA precision wire winders are available in standard sizes as well as custom sizes to suit your manufacturing needs. All models offer unique features not available from other manufacturers including EasyWind Windows™-based software which allows easy operator set up and control.*

#### **Features include:**

- compact design allows for easy transport and placement in small space or clean room
- adjustable tailstock accepts any length arbor
- adjustable spool tension
- wind lengths up to 80 inches
- intuitive EasyWind Windows-based software for specifying coil features

#### **Available Options:**

- pitch correction feedback module for wire diameter compensation
- multi-filar payout systems
- manual or electronic spool tensioning
- payout guide attachment for close-to-arbor coiling
- torch or heating elements, glue applicators

#### **Custom machines include:**

- wind length up to 156 inches
- high-speed precision spindles capable of 6000 RPM
- full CNC programmable control operations
- fully automatic operation (feed, cut, coil, deliver)
