

CUSTOM APPS

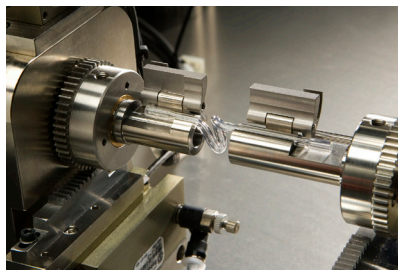

INSTRUMENTS & MACHINES

For over 30 years RothGreaves & Associates has provided a broad range of engineered-solutions to medical device manufacturers, high precision industries, electronic manufacturers and pharmaceutical laboratories.

These instruments and manufacturing systems have a global presence with customers around the world as well as our domestic customers and their off-shore facilities.

We have the experience and knowledge to successfully develop new and unique instruments, medical device manufacturing systems and specialty systems.

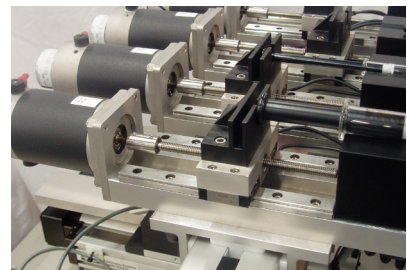

Our process for developing a custom application begins by drafting an Equipment Specification and finishes with the completion of a Factory Acceptance Test prior to shipment. Our General Specifications Document can assist you in developing a working machine specification.

Tube Loop Forming Machine

Functional Attributes Test Station

Precision Fluid Delivery

We've designed and built quality assurance instrumentation, life-cycle test instruments, miniature assembly, ultra-sonic welding, resistance welding, camera inspection, camera-driven motion, precision dispensing, custom ovens, fluidized bed applications, engineering work stations and many more. Call us at **1-952-404-2604** to discuss your needs and begin the development process.
